

**Model Creators.  
Collectors.  
Artists.**

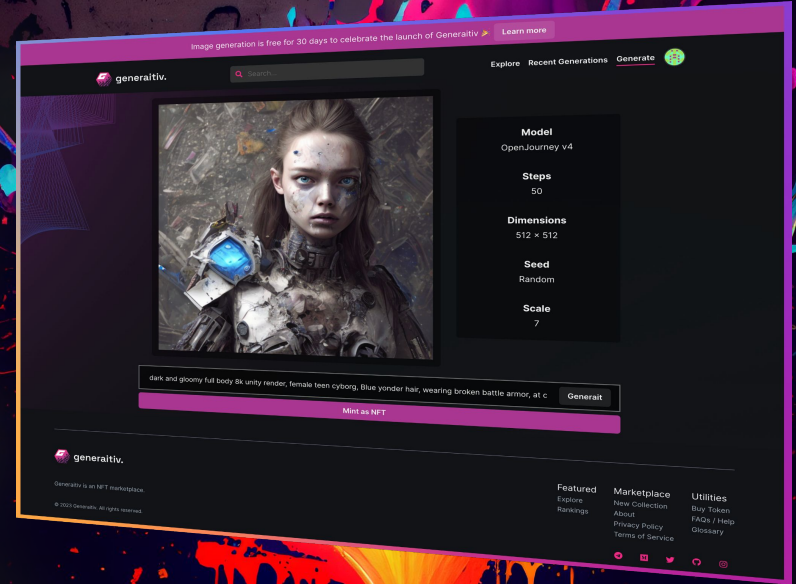

Generaitiv is a community-driven AI platform  
**built to empower AI contributors.** We recognize  
and **reward your efforts** through scalable  
grass-roots approaches.

Generaitiv's AI platform integrates existing and new monetization mechanisms to provide an improved experience and **opportunity to monetize your work.**

AI should be open, decentralized, and accessible to all. The benefits of Artificial Intelligence should go to the community, and not be censored or controlled by any one company.

Join Generaitiv in shaping the future of AI technology.

# Launch Features

## Image Generation

Use the Generativ AI or **peer created** models to generate unique images from text prompts and image inputs at **no cost**.

## Model Providence

**Secure your work** with an immutable record of your Model's providence, using decentralized technology to **verify** if your AI Model was used to create an image.

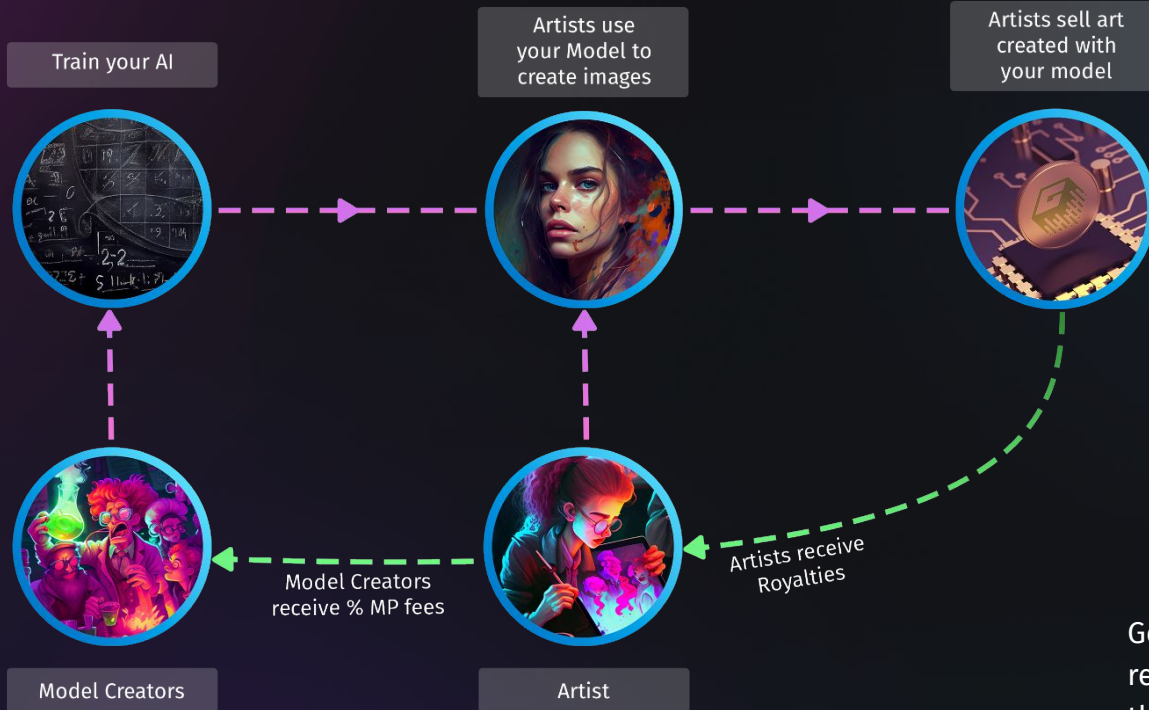

## NFT Marketplace

Use Generativ's NFT Marketplace to **monetize your art** on the Ethereum Blockchain with the **click of a button**.

# Model Royalties

Generaitiv abides by the ERC-2981 standards for respecting royalties. Proceeds of sales will go to the the artists and the platform will support AI model creators.

# Tokenomics

Generaitiv Artificial Intelligence token

**\$GAI** Symbol

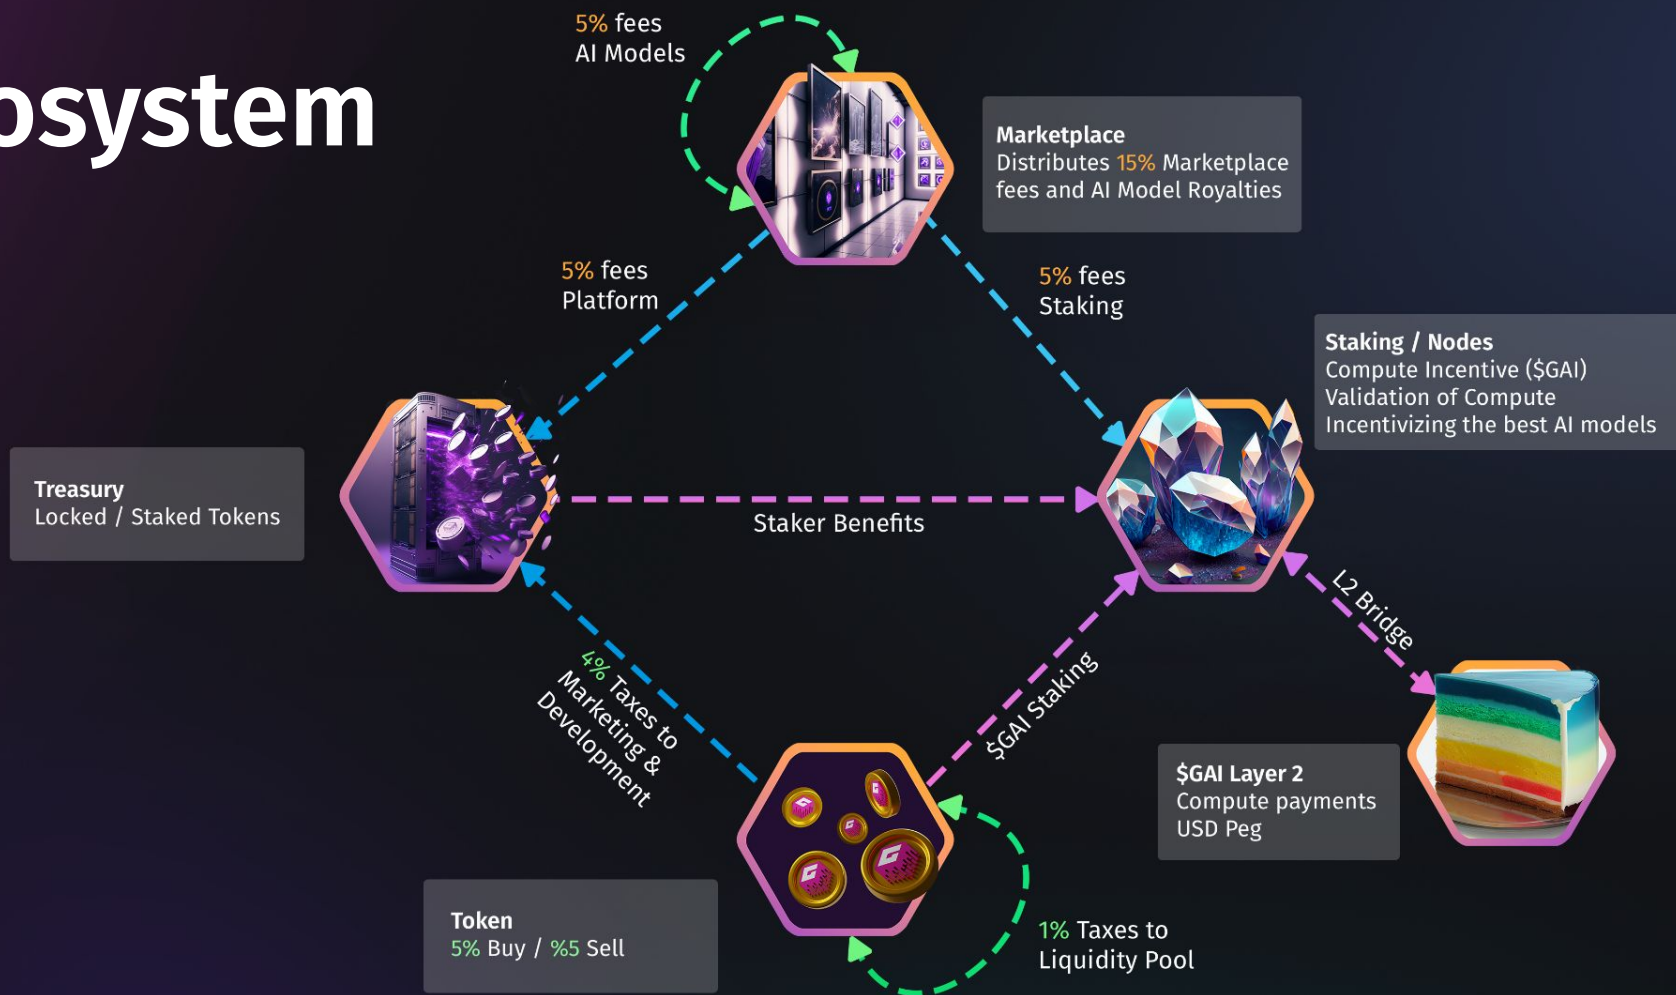

**10m** Supply

**7m** Liquidity

**5%** Buy Tax / **5%** Sell Tax

# Ecosystem

# \$GAI Staking

The tokenomics of \$GAI staking are represented by the following equation:

**S** - Amount Staked

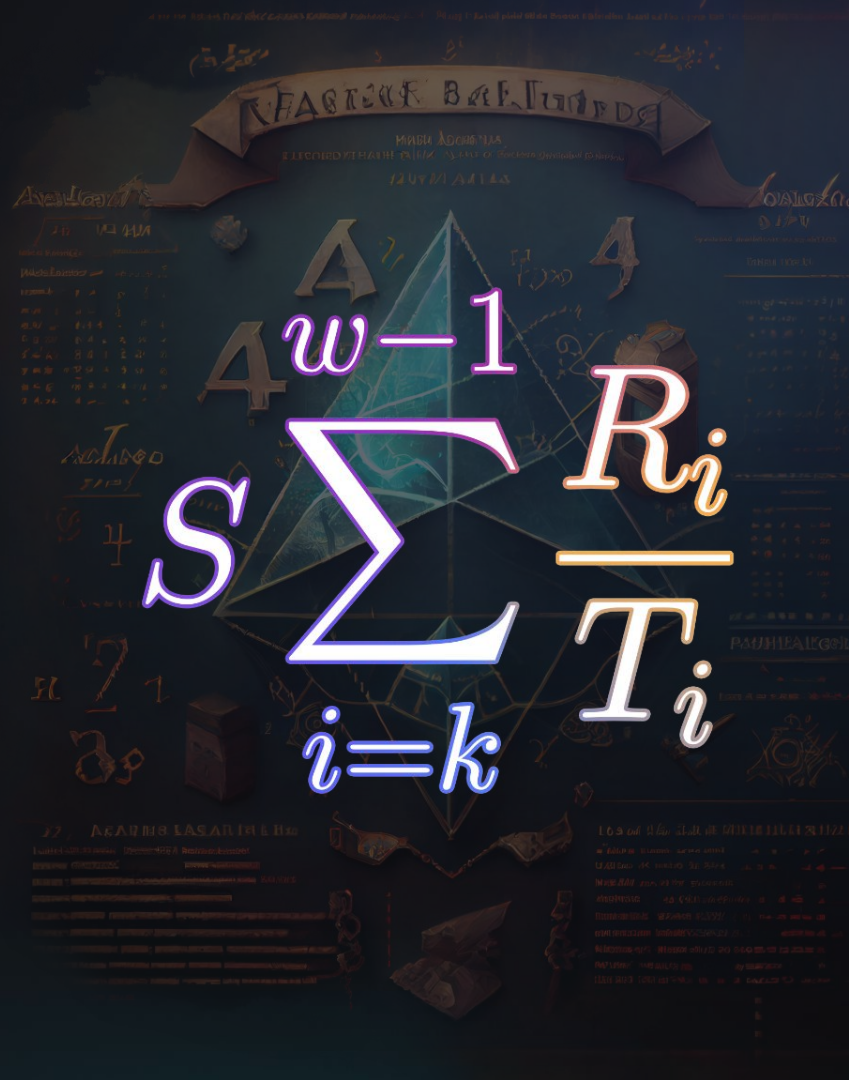

**w** - Block Withdrawn

**k** - Block you Started Staking

**R<sub>i</sub>** - Reward Payout at Block *i*

**T<sub>i</sub>** - Total Amount Staked at Block *i*

With each iteration of *i* your reward grows by the fraction you own of the total \$GAI staked multiplied by the reward of that iteration.

# Roadmap

## Stage 1 - Launch

- ☒ NFT Marketplace
- ☒ AI Image generation
- ☒ AI Model Royalties
- ☒ Creator Royalties
- ☒ Gasless listing
- ☒ \$GAI Token Launch

## Stage 2 - Feature Release

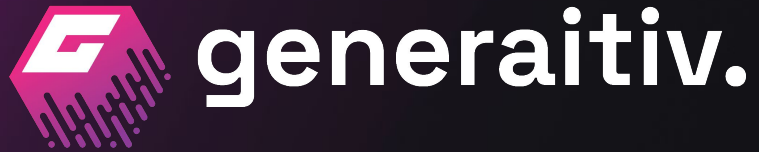

- ☐ Model Provenance
- ☐ Model Analytics
- ☐ \$GAI Staking
- ☐ Prompt Masking

## Stage 3 - On-Platform Utilities

- ☐ Decentralized AI Compute
- ☐ Post-generation Image Editing
- ☐ Img2img
- ☐ Inpainting and Outpainting
- ☐ On-platform Social Tools

## Stage 4 - Hosted Services

- ☐ Decentralized Model Training
- ☐ Decentralized Compute
- ☐ AI Music
- ☐ AI Videos
- ☐ AI Text

Ready to **get started?**

Check out **beta.generaitiv.xyz** and start generating images right away!

Create images, train models, and get rewarded with **Generaitiv** today.
